CONDITIONS OF SALE

The prices quoted herein cancel all previous lists and quotations.

Packing is free of charge.

All prices quoted are F.O.B. Morristown, New Jersey in U. S. Dollars unless otherwise specified.

Our regular shipping season extends from April 15th to November 15th. Although we take every precaution when packing orders, we cannot guarantee safe delivery in colder weather. Such orders travel at your own risk.

PLEASE, DO NOT include payment with your order. Payment should be made upon receipt of invoice.

Shipments are forwarded via Railway Express unless otherwise specified.

If possible, second choice should be included to replace any varieties that may be sold out.

P R E F A C E

Once again it is our privilege to publish this list of orchids for your approval and to furnish you with a variety of genera in a wide range of prices from which to choose. If you desire anything in the way of orchids not included in this list please write and we will endeavor to fulfill your requirements.

We have been growing orchids for three generations. Our collection is comprised of the finest imported and domestic hybrids obtainable. We have been awarded many gold and silver medals and cultural certificates for our fine hybrids.

In the past we have purchased from the foremost hybridists, flasks of selected crosses in order to increase our own stock. We are offering a few of these for sale to give the purchaser a wider variety from which to make a selection.

Our own crosses plus those we have purchased are the result of careful consideration and forethought. We have used only the finest seed and pollen parents to insure strong growth and productivity of the plant; color, texture, and size of the blooms; and your confidence and satisfaction in our efforts.

The mature plants found herein and the divisions and backbulbs listed are from our own collection of fine plants that we use for cut flower purposes. The main reason that the majority of the mature plants and the pieces thereof are being offered is that they flower in a period of over production in our cut flower department.

Feel free to communicate with us at any time concerning your orchid growing problems. Our laboratory and numerous experimental projects are conducted here to find better methods in growing and to solve problems in orchid culture.

Whether it's an order or a problem, may we have the pleasure of hearing from you? Visitors are always welcome.

Wm. M. Wilson

SPECIAL COMMUNITY POTS

3 Plants per pot

In this we strive to give you what we think many would prefer in order to have a variety of crosses in their collection, instead of 15 or 20 plants of any one cross.

No. Cross	Cross	Price Per Pot
50006	C. MOSSIAE X LC. CHAS. FUTTERMAN Exceptionally fine dark Mossiae crossed LC. Chas. Futterman, dark with beautiful very deep purple lip.	\$3.00
50007	C. MOSSIAE X C. TRIMOS Made with the finest of parents.	3.00
60206	C. ADELA X C. TRIANAE Should make fine December blooming hybrid. Made with selected parents.	3.00
60210	BC SOULAGE X C. MARGARET PURCELL Will be a nice dark hybrid of the finest type.	3.00
60370	C. OMAR X LC. AUSBURY A hybrid of exceptional merit should be the result of this cross with accent on color.	3.00
70145	C. BELGICA X C. FRED SANDER A fall blooming hybrid. Medium orchid with dark lip. Do not overlook this cross as it should be an excellent producer.	3.00
70160	LC. ARRIS ALBA X C. BEMBRIDGE ALBA A beautiful white with colored lip will be the product of this cross.	3.75
50008	(LC. CAMERONIAN X C. MT. ROYAL) X C. CHEROKEE Should produce medium large flowers, orchid to lavender in color, dark lip, gold throat. Christmas—New Year's flowering.	3.00
50016	L. ANCEPS ALBA (Bulls Var.) X C. BARBARA BILLINGSLEY The Anceps Alba used in this cross was outstanding. Extremely fine shape, color and quality. Barbara Billingsley parent produced 14 flowers at time of hybridizing.	4.50
50015	C. BARBARA BILLINGSLEY X C. JOYCE HANNINGTON (Gold Medal winner) This we believe to be the very finest white hybrid made to date. Barbara Billingsley, a very fine free producing white, crossed Joyce Hannington, a Gold Medal winning white.	7.50

HYBRID ORCHID SEEDLINGS IN INDIVIDUAL POTS

Cross No.	Cross	Pot Size	Price
20000	C. TRIMOS X LC. CHAS. FUTTERMAN A very fine Chas. Futterman was used with a C. Trimos of merit.	4"	\$14.00
50000	C. WHITE EMPRESS One of the freest flowering large pure white Cattleyas ever produced.	4"	18.00

50006	C. MOSSIAE X LC. CHAS. FUTTERMAN Exceptionally fine dark Mossiae, crossed Chas. Futterman, dark with very dark lip.	2½"	5.00

ESTABLISHED CATTLEYA SPECIES

- C. Intermedia Alba
Price on application.
- C. Skinnerii \$6.00 to \$7.50
Flowers 2 to 3 inches, clusters 3 to 8, rose purple in color, lip darker, throat pale.
- C. Skinnerii Alba
Price on application.
- C. Mossiae \$7.50 to \$15.00
Flowers large, handsome, light to dark rose sepals and petals. Lip crimson, rose, and yellow.
- C. Labiata \$7.50 to \$10.50
Flowers 6 to 8 inches, 2 to 7 flowered. Sepals and petals bright rose, lip crimson purple.
- C. Gaskelliana \$7.50 to \$10.50
3 to 5 flowered, flowers 5 to 6 inches, S & P light rose purple, throat light yellow.
- C. Gigas \$10.50 to \$15.00
Flowers 8 to 10 inches, 2 to 7 flowered, S. & P. rose, lip crimson purple, throat yellow.
- C. Trianae \$5.00 to \$7.50
Flowers 4 to 7 inches. Sepals and petals light rose, lip purple and variable in size.
- C. Schroederiae \$7.50 to \$10.50
Flowers large, Sepals and petals light rose, lip light rose, edges fringed.
- C. Dowiana \$7.50 to \$15.00
Flowers large, sepals and petals Nankeen yellow, Crimson flecked. Lip crimson purple, streaked gold.

Ready for shipment in June of 1950

- C. Amethystoglossa \$6.50 to \$8.50
Flowers large, usually one. Four or more inches across, Sepals and petals bright rose purple spotted, lip magenta.
- C. Bicolor \$6.50 to \$8.50
Flowers about 4 inches across, Sepals and petals bronze green, lip rose purple, sometimes margined white.

C. Forbesii	\$6.00 to \$7.50
Flowers 3 to 4 inches across, 2 to 5 in number. Sepals and petals yellowish in color, lip yellow streaked with red.	
C. Guttata	\$6.50 to \$8.50
Flowers 2 to 4 inches across, 4 to 15 in number. Sepals and petals tawny yellow, spotted crimson, lip rose purple.	
C. Guttata var. Leopoldii	\$7.50 to \$9.50
Habit stronger than type, spikes of as many as 30 flowers.	
C. Harrisonae	\$6.00 to \$7.50
Flowers about 3 inches across, 1 to 4 in number. Pale lilac rose, yellow throat.	
C. Intermedia	\$6.00 to \$7.50
Habit like Harrisonae, S. & P. white flushed with rose. Lip rose purple.	
C. Rex	\$10.00 to \$15.00
Flowers 5 to 7 inches, 2 to 7 flowered. S. & P. creamy white to yellow, lip crimson red, shaded white and yellow.	
C. Luteola	\$8.00 to \$10.00
Flowers about 2 inches across, pale yellow in color, side lobes of lip streaked purple.	
C. Walkeriana	\$8.00 to \$10.00
Flowers average 4 inches. Sepals and petals soft rose, lip deep rose. Flowers born on leafless stem.	

BOTANICAL ORCHIDS

CONDITIONS OF SALE

As United States representatives of reliable collectors in Central and South America, we offer the following list of strong unestablished plants. On the first of each month we send our order to the collectors who in turn gathers fresh plants in the jungles and forwards them, via air express, to this country. Please allow about 6 weeks for delivery.

These imported plants must go thru quarantine and fumigation. On some of the softer and bulbless types of plants, fumigation often causes leaves to burn or drop. At the prices quoted below, we will not be held responsible if such conditions exist. Plants will be forwarded as received.

(Unestablished. Shipped as freshly collected.)

MINIMUM ORDER—\$10.00

Acineta, Densa	S & P yellow, spotted crimson	\$2.50
Arpophyllum, Giganteum	S & P rose purple, lip deep red	2.50

GOMEZA PLANIFOLIA

(Punch and Judy)

	Small	Med.	Large
G. Planifolia	\$ 4.50	\$ 5.50	\$ 6.50
Producing 2 or more arching scapes. Many flowered. Flowers small, yellow, fragrant.			

BRASSAVOLA

(Ready for shipment in June)

	Small	Med.	Large
B. Digbyana	\$ 6.50	\$ 7.50	\$ 8.50
Flowers large, usually one, 4 or more inches across. Sepals and petals are narrow and greenish white, lip creamy white, broadly rounded with a heavy fringed margin.			

Orchids By Wilson

Madison Avenue, Morristown, New Jersey

"GROWING ORCHIDS IN YOUR HOME"

To start, there is no deep dark secret to growing ORCHIDS IN YOUR HOME, only a few simple requirements are necessary. We list these below in simple terms and if followed, you should be successful as many of our customers are.

LIGHT

Orchids require plenty of light, but not direct sun light. Sun light should be diffused through a lightly woven curtain or the better grade of cheese cloth. The object being to give the plants all the sun light possible without the burning rays of the sun striking them directly. From November 15th to March 15th Orchid plants can enjoy full sun light, as most of the heat is gone from the sun during this period.

HUMIDITY

Humidity is necessary to the health of your Orchid plants. This is best provided in the home by the evaporation method. Humidity by evaporation is obtained by providing a shallow pan, watertight, not over one inch deep and usually made a shape to fit a wide window sill or plant stand. This pan is filled to within one quarter inch of the top with fine clean gravel; set pan level and pour in enough clean cool water to completely cover the gravel. You need a wood rack to place your plants upon, this can be made of $\frac{1}{2}$ " x 1" wood slats about $\frac{1}{4}$ " apart and cut a little longer than the length of your watertight pan. This is so the rack will rest upon the edges of the pan. Do not rest the rack upon the gravel or your pots will get too wet. This is bad for your plants. Any handyman can put this together in a very short time, at very little expense.

HEAT

Orchid plants DO NOT require a great amount of heat; they will thrive and flower in temperatures as low as 58° F., and will stand temperatures during the hot summer days to 110° F., but at such times they must have a lot of air circulation and closer attention to watering. A good method is to hang your plants out under a tree that does not cut off all the sun light. At other times a temperature that is comfortable to you in your home is all that an Orchid plant requires.

WATERING

DO NOT over water your Orchid plants; keep them just nicely moist while they are growing. A water soaked plant will soon turn yellow and die. DO NOT use fertilizer of any kind unless recommended by an Orchid grower. Water plants good once a week, the rest of the week just keep the fibre slightly on the moist side, and then water only when it is dry. NEVER mist spray over the leaves or do any watering on COLD, SUNLESS days, put it off until you have a warm, sunny day. Keep your plants out of any direct COLD DRAFT.

POTTING

Repotting should be done when roots are beginning to develop on new growth. Once every two years is often enough to repot and then only if the plant is too large for its present pot or the osmunda has deteriorated.

VARIETIES

Any of the Cattleya Orchids or their hybrids will grow in the home; many of the Botanicals do very well and are interesting and beautiful. We do suggest that you start with the less expensive types such as the Cattleya species and Botanicals. We carry a full line of all Species and a great variety of Botanicals, as well as thousands of Hybrids from the flask to mature flowering size plants.

IMPORTANT NOTICE

On the following pages you will find advertised, products of great value to orchid growers. We use and recommend that you use, all of these products in your establishment.

We have established a policy of never selling anything that we do not use ourselves. These commercial products are unreservedly recommended for their quality and their usefulness in your orchid house.

Dealer and commercial growers inquiries invited.

LUR-A-SLUG

For Complete Eradication of Slugs and Snails in Greenhouse and Garden

LUR-A-SLUG will attract and kill Slugs and Snails by any method of application. Slugs and Snails are most active and do their feeding during the night. Therefore, for best results apply after watering-down late in the afternoon or at dusk. If kept dry its effectiveness will last for weeks.

It has been found that some large Slugs live as long as 24 hours after feeding on **LUR-A-SLUG**, but during this period they are violently ill, entirely incapable of taking further nourishment of any kind, and although they may crawl as much as two feet away from the point of ingestion, they surely die.

LUR-A-SLUG contains over 50% active attracting and killing agents plus a fragrant booster bait, plus a sweet tasting food ingredient all smoothly compounded into a balanced formula to insure positive kill. No arsenic or arsenical compounds are used.

HOW TO USE: Any method of applying **LUR-A-SLUG** will attract and kill. For greatest efficiency and economy place small mounds or sprinkle small areas about every two feet apart along the bench and sides of walks. Keep dry. The fragrance of **LUR-A-SLUG** is volatile, therefore when not in use keep can covered.

To prevent unsightly decomposition it is recommended that Slugs be collected each morning.

LUR-A-SLUG is non-toxic to handle and entirely safe to use in the presence of growing plants. However, if taken internally in large quantities **LUR-A-SLUG** can be poisonous to animals.

Developed and guaranteed by Botany Chemical Company.

**WATER
SOLUBLE
PLANT
FOOD**

Feeds 15 Trace Elements

*Satisfies All Major Plant
Food Needs - - - Feeds
"Hidden Hunger" in Plants
With 15 Essential Elements*

Trace L goes far beyond any ordinary fertilizer or plant food because it contains essential mineral elements so often lacking in apparently fertile soil. It was developed after exhaustive research on the trace mineral elements essential to rapid, uninterrupted growth. These elements help to assure growing plants — indoors or outdoors — sturdy, luxuriant growth, and resistance to disease and insect pests. All elements are scientifically balanced for safe and successful use on all plant life.

EASY TO USE . . . ECONOMICAL

Trace L contains no filler! It's completely soluble. Every minute particle is **instantly** available plant food. One teaspoonful in a gallon of water treats 100 square feet. Every pound jar makes 100 gallons of Trace L solution. Apply sparingly at each plant or sprinkle generously over entire area. Non-toxic . . . not injurious.

TRACE L FORMULA . . .

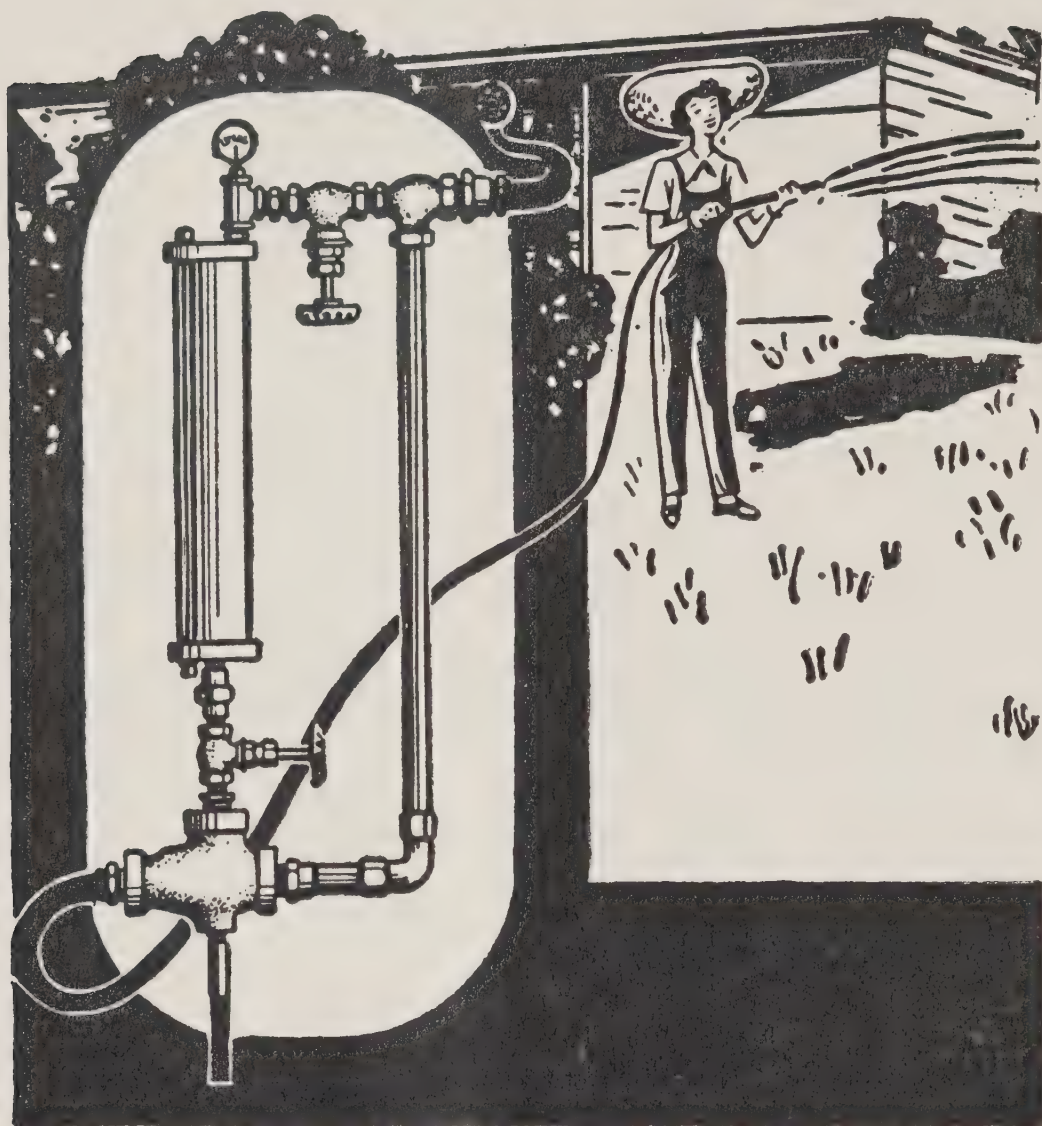

Nitrogen, Phosphorus, potassium, calcium, magnesium, iron, sodium, sulphur, manganese, zinc, boron, iodine, copper, molybdenum, cobalt in guaranteed amounts.

IN JARS—lb. **\$1.00** ½ lb. **65c.**

IN DRUMS—15 lbs. **\$9.00**

35 lbs. **\$21.00** 100 lbs. **\$55.00**

liquid fertilizer

Kill
mosquitoes,
flies, Japanese
beetles

WITH BUGHOZZER

Here's the most useful, versatile and efficient labor saving device ever offered home owners, greenhouse and nurserymen, golf greenkeepers and park superintendents.

Scientifically engineered for proper proportioning and built for years of service, BUGHOZZER turns 1 quart of concentrated liquid into 65 gallons of mixed spray simply by connecting garden hose to it and using ordinary water pressure. Works accurately with all Hozzer side sprays and other recommended formulas which are water soluble; Rotenone, DDT, Chlordane, Fungicides, 24D Weed Killers and Fertilizers. Fully Guaranteed. \$34.50.
